Educational Focus

A compilation of ELEVATOR WORLD articles in our Educational Focus Series. These articles include hands-on construction and maintenance procedures and techniques that can be used by field personnel to install, troubleshoot and repair elevators & escalators. Directed toward the needs of service technicians and construction adjusters who install, adjust and maintain elevator and escalator systems. Chapters included are as follows: • Elevator Controllers • Elevator Door Operators • Hydraulic Elevators • Dispatching Systems • Elevator Drive Systems • Elevator Door Protection Systems • Elevator Guide Rails • Elevator Safeties and Governors • Elevator Car Enclosures • Elevator Hoisting Machines • Escalators • Elevator Communication • Machine-Room-Less Elevators • Elevator Suspension Systems • Testing Equipment • Elevator Entrances • Remote Monitoring • Freight Elevator Doors • Elevator Management Systems

Softback, 200 pages, Wt. 2 lbs. $55.00

The Elevator World Source® Directory 2004

In print or on CD. Includes detailed listings of elevator/escalator industry suppliers, consultants, contractors, associations and publications. Locate companies alphabetically, geographically or by the products and/or services they provide.

The CD version in Adobe Acrobat® PDF format.

Print $40.00, CD $37.50
Set (Print & CD) $67.50
Bulk Orders (2 or more) $35.00 each for print or $32.50 each for CD

Field Employees’ Elevator Testing Manual

This handbook was designed to provide a guide to persons assigned the task of performing various tests on electric and hydraulic passenger and freight elevators in the presence of a certified Elevator Inspector. This publication can help with understanding of what is being tested, why it is being tested and a safe means to demonstrate the function.

Softback, Wt. 1 lb. $10.00

Elevator Rescue and Fire Service Operation

by Dave Jones – Bluegrass Elevator Safety Training L.L.C.

This video covers the basic components and operation of phase I and phase II elevator fireman’s service and several rescue options on several makes of equipment.

VHS Format – Length: 30 minutes
Wt. 2 lbs. $100.00

For detailed information and easy online shopping: www.elevatorbooks.com
NEII-1-2000
Building Transportation
Standards and Guidelines

NEII-1-2000 provides a reference for the dimensional, performance, application and evaluation requirements of building transportation systems. Architects, engineers, consultants, builders, owners, elevator suppliers and other individuals involved in the installation, modernization and maintaining of building transportation systems will find these standards and guidelines an invaluable source of reference and information. Typical uses include: specifying new building transportation equipment, specifying modernization of existing building transportation equipment and evaluating building transportation maintenance and performance. The standards and guidelines are published by National Elevator Industry Inc. (NEII), whose members are companies in the building transportation business.

NEII-1-2000 Set Full Print Document and CD
Including CAD Drawings Wt. 3 lbs. $37.50 (Regularly $75.00)

NEII-1-2000 CD-Rom, Wt. 1 lb. $17.50 (Regularly $35.00)

NEII-1-2000 Print Version
272 pages with 8 tabs, 5-hole drilled Wt. 3 lbs. $25.00 (Regularly $50.00)

ADA and Building Transportation – 2nd Edition
by Edward A. Donoghue

COMPARES THE NUMEROUS ACCESSIBILITY REGULATIONS APPLICABLE TO BUILDING TRANSPORTATION AND PROVIDES THE READER WITH DETAILED INFORMATION TO COMPLY WITH THE REGULATIONS. AN ANALYSIS FOR THE REGULATIONS CLEARLY IDENTIFIES THE MOST STRINGENT, WHICH IF ADHERED TO WOULD ASSURE COMPLIANCE TO ALL.

Industry members who design, market, install, maintain, repair, modernize and inspect, as well as architects, engineers, building owners and managers, will find this handbook an invaluable reference.

ADA and Vertical Transportation, written by Edward A. Donoghue, CPCA, president of Edward A. Donoghue Associates, Inc., Code and Safety consultants in Salem, New York, identifies where the various accessibility regulations apply. The regulations for elevators, wheelchair lifts and escalators are also analyzed, with explanations, examples, drawings, checklists and excerpts from cited documents.

Softcover, 182 pages Wt. 2 lbs. $25.00 (Regularly $50.00)

The Legal Super pack

The legal superpack is five great Elevator World legal products for only $200.00. Included are: Elevator Law and Liability. Elevator & Escalator Accident Reconstruction and Litigation. Defensive Elevatoring PLUS the hydraulic and traction elevator posters. $200.00

For detailed information and easy online shopping: www.elevatorbooks.com
CAT™ stands for the Certified Accessibility and Private Residence Lift Technician education and certification program. CAT is a part of the CET program, a two-year education curriculum that aims at accessibility contractors. Like CET, CAT will have Grandparent and candidate options, and materials will be available from Elevator World – beginning with the Grandparent Test Study Guide (right) available December 1, 2003.

**CAT Grandparent Test Study Guide**

This book contains a databank of over 500 questions and answers from which 125 will be randomly generated for the Certified Accessibility and Private Residence Lift Technician (CAT™) Grandparent Exam. The Study Guide for this exam will be available on December 1, 2003 and the exam will be open January 1, 2004 for those who qualify.

$25.00

**CONTINUING EDUCATION – ELEVATOR FIELD SAFETY COURSE**

Certified Elevator Technicians (CETs™) who have passed the NAEC CET Grandparent Exam (between January 2002 and December 2004) or who have completed the 4-year CET Candidate Education program will need to have 10 contact hours of continuing education including safety in order to re-certify every year in December. Elevator World has packaged an “Elevator Field Safety Course” (EFSC) based on existing self-study materials widely available in the industry. The EFSC cost is $75.00 and counts as three and one-half contact hours. $75.00

**CET™ Grandparent Test Study Guide 2nd Edition**

This book contains a database of the over 1,200 questions and answers from which 150 questions will be randomly generated for the Certified Elevator Technician Grandparenting Exam, given between October 1, 2002 and December 31, 2004. (Only one year left!)

CET Educational Materials

Certified Elevator Technician (CET™) Education Program Materials

CET-S Supervisor Training Course
Includes Core Curriculum (First 2 Years)
Textbooks and Training Aids

Kit contains:
• CET-S Training Manual • CET-S Log Book • Unit 1 - Elevator History and Basic Safety • Unit 2 - Basic Print Reading • Unit 3 - Handling Materials & Tools/Rigging & Hoisting • Unit 4 - Pit Equipment • Unit 5 - Guide Rails • Unit 6 - Machine Room Equipment • Unit 7 - Hoistway Equipment • Unit 8 - General Maintenance Practices • Unit 9 - Maintenance of Traction Elevators • Unit 10 - Maintenance of Hydraulic Elevators • Unit 11 - Maintenance of Escalators & Moving Walks • Poster of Elevator Systems • Anatomy of Elevators (CD) • First issue of complimentary subscription of ELEVATOR WORLD

$600.00 (NAEC Member) $750.00 (non-NAEC Member)

Course I – Introduction to Elevators
Approximately six months study and field work (79 class hours, 1,000 field hours).

Kit contains:
• Candidate Course Guide • Unit 1 - Elevator History and Basic Safety • Unit 2 - Basic Print Reading • Unit 3 - Handling Materials & Tools/Rigging & Hoisting • Skills Verification Portfolio (Blue) • Poster of Elevator Systems • Video: Safety While Servicing Elevators • Video: Safety While Installing Elevators • Elevator Industry Field Employees’ Safety Handbook • Field Maintenance Guide by Zack McCain • First issue of complimentary subscription of ELEVATOR WORLD

$500.00 (NAEC Member) $600.00 (non-NAEC Member)

For detailed information and easy online shopping: www.elevatorbooks.com
COURSE II – BASICS OF INSTALLING ELEVATOR COMPONENTS
Approximately six months study and field work (90 class hours, 1,000 field hours).
Kit contains:
• Candidate Course Guide • Unit 4 - Pit Equipment • Unit 5 - Guide Rails • Unit 6 - Machine Room Equipment • Unit 7 - Hoistway Equipment • Tri-fold pamphlet – History of NAEC and CET • Skills Verification Portfolio (Green) • The Installation Manual published by Elevator World, Inc. • Electric Elevators by Fred Hymans • Continuation of subscription to ELEVATOR WORLD

$550.00 (NAEC Member) $650.00 (non-NAEC Member)

COURSE III – MAINTENANCE PRACTICES AND TESTING
Approximately six months study and field work (87 class hours, 1,000 field hours).
Kit contains:
• Candidate Course Guide • Unit 8 - General Maintenance Practices • Unit 9 - Maintenance of Electric Elevators • Unit 10 - Maintenance of Hydraulic Elevators • Unit 11 - Maintenance of Escalators • Skills Verification Portfolio (Orange) • The Maintenance Manual by Zack McCain • The Maintenance Field Handbook by Zack McCain • The Inspection Handbook by Zack McCain • Sam and Samantha by ELEVATOR WORLD

$560.00 (NAEC Member) $660.00 (non-NAEC Member)

Available December 2003

For more information on both the CET or CAT Grandparent Option and the CET or CAT Candidate Option inquire at http://www.naec.org.

CET™ and CAT™ are the registered trademarks of the National Association of Elevator Contractors, Conyers, Georgia.

Safety Training Video/DVD produced by industry training professional Zack McCain.

This video/DVD follows the guidelines set forth in the 2000 Elevator Industry Field Employees’ Safety Handbook. An ideal safety training tool!

Safety Training for Elevator Service and Construction
(Combined set – 2002 Edition)

Service Safety:
• Maintenance in the pit, hoistway and machine room
• Maintenance of escalators and moving walks
• Dumbwaiter service
• MSDS and container labels
• Use of solvents and painting equipment
• Correct apparel and personal protection
• Safety harness and lanyard
• Lockout-tagout procedures
• Jumpers and alligator clips – approx. 35 mins.

Construction Safety:
• Constructor’s correct apparel and protective equipment
• Removal of rubbish
• Electrical lockout-tagout
• Working with live electrical circuits
• Safety harness, lanyards and lifelines
• False cars
• Beam clips, rigging slings and hitches
• Hoisting procedures
• Fire-prevention methods – approx. 35 mins.

Service and Construction combined on 1 VHS $175.00
Service and Construction combined on 1 DVD $180.00
Wt. 1 lb. each Length: approx. 1 hr. and 10 minutes

First Due: Elevator Rescue
Introduces the firefighter to the components of the elevator system, emergency operation of elevators, the Rescue Action Plan as it pertains to elevator rescue, discussion of different elevator rescue situations and safe operations around elevators.

1 video tape/instructor’s manual/5 workbooks Wt. 7 lbs. – $175.00

Package of 5 additional workbooks Wt. 2 lbs. – $40.00

The 2000 Elevator Industry Field Employees’ Safety Handbook in Spanish
Translated from the Elevator Industry Field Employees’ Safety Handbook.
Includes up-to-date safety procedures for protection of field employees on every construction or maintenance job.

Softback, 144 pages, Wt. 1 lb. $6.00

Sam and Samantha The Mainteneers
by George R. Strakosch

Sam and Samantha are fictionalized versions of real people. Their stories, which really happened, are a sample of what elevator personnel encounter in the day-to-day task of taking care of elevators. Elevator mainteneers are the front lines of the elevator business; a profession that is so unique that few other careers in the world can compare.

**Softback, Wt. 1 lb.**

$22.50

Lift Modernisation Design Guide
by Roger E. Howkins

A comprehensive guide to modernization.

Nine stages of any elevator modernization are detailed in a series of data sheets defining the design issues, safety implications and essential criteria particular to each scheme. Detailed drawings provide assistance in identifying components for the novice as well as the expert.

**Loose-leaf binder, 250 pages, Wt. 3 lbs.**

$79.95

ELEVATOR MAINTENANCE MANUAL

and the companion

ELEVATOR FIELD MAINTENANCE HANDBOOK

by Zack McCain

The Elevator Maintenance Manual is an in-depth guide designed for the service technician, covering elevator maintenance programs and practices as related to both electric and hydraulic elevators. Also covers escalators and moving walks. This publication is a comprehensive “how-to” guide that can be used for training classes, home study or as a reference guide.

The Field Handbook is a pocket-sized companion designed for the service mechanic to take into the field. Contains over 75 charts and guides.

**Elevator Maintenance Manual** – Softback, Wt. 3 lbs. – $55.00

**Elevator Field Maintenance Handbook** – Softback, Wt. 1 lb. – $14.00

**Elevator Maintenance Manual and the Field Handbook Set** – $65.00

Bulk discounts available, call for quote.

New Materials and New Technologies Applied to Elevators  
_by Antonio Miravete_

Antonio Miravete, a leading researcher in Transportation Engineering, explores the most significant changes and developments in materials and technologies as applied to elevators and escalators. This comprehensive publication provides a solid discussion of new materials and technologies through the use of text, illustrations, photographs, diagrams and formulas. It is a must for companies and individuals looking to the future of elevator and escalator design, manufacturing and function.

**Hardback, 272 pages, Wt. 3 lbs. $74.95**

---

Installation Manual  
_Published by ELEVATOR WORLD_

Brimming with photos of actual installation procedures and diagrams. Although published for quite some time, the information continues to be timely and valuable.

The manual includes a brief history of elevators, lessons in layout drawings and reading and describes the installation process for a traction elevator from the pit through the hoistway and into the machine room. Step-by-step descriptions are included for hydraulic elevators and escalators.

**Softback, 505 pages, Wt. 3 lbs. $40.00**

---

Pedestrian Planning and Design  
_by John J. Fruin, Ph.D._

Describes and qualifies the space people need to walk, queue, crowd and wait. It discusses the space people need to access buses, trains, planes, elevators and escalators as well as the number of people that can walk on stairs through corridors, turnstiles, revolving doors, etc. Contains photos, diagrams and elevator/escalator configurations.

**Softback, 214 pages, Wt. 1 lb. $25.00**

---

Elevator Mechanical Design, 3rd Edition  
_by Dr.-Ing. Lubimar Janovsky_

The technology of “how to achieve the mechanical aspects of the design” of an electric elevator as well as discussing why the designs are implemented in a particular way. The principles and concepts of all the mechanical components of an elevator are discussed in detail, supported wherever necessary by mathematical analysis. A full description and comparison of international standards is also included. The 3rd edition contains 40% new material and brings elevator technology into the new millennium.

**Hardback, 401 pages Wt. 3 lbs. $79.95**

---

Elevator Traffic Handbook Theory & Practice  
_by Dr. Gina Barney_

The movement of people by natural and mechanical means needs to be carefully planned: an under provision is costly or impossible to correct and an over provision is a waste of financial resources. This book deals with this subject in four parts. Up-to-date with latest analysis techniques.

**Hardback, 456 pages Wt. 3 lbs. $125.50**

---

The Vertical Transportation Handbook
Third Edition
by George R. Strakosch

The “Bible of the Elevator Industry” is a valuable guide for both the practitioner and the uninitiated person who is faced with understanding and making decisions about the application of elevators and escalators.

The book describes the application process, construction, operation, maintenance, problem solving and unique applications.

Hardback, 564 pages, Wt. 3 lbs. $130.00

Elevator Industry Inspection Handbook – 2nd Edition
by Zack McCain

Now complies with ASME A17.1 1996 and all addenda through 2000.

A simple pocket reference for field use. Brimming with tables featuring the effective date of code changes. Helps the experienced elevator inspector, assures compliance with ASME QE1-1.

Softback, Wt. 1 lb. $19.00

Also see page 2 for the NEW Field Employees’ Elevator Testing Manual.

Elevator Electric Drives – Concepts and Principles, Control and Practice
by G.C. Barney and Loher AG

This book is of interest to anyone in the elevator industry concerned with the application, design and maintenance of modern hoisting machines. The technical information, in general, is universal and can be applied to any of the new solid state AC motors.

Spiral Bound, 197 pages Wt. 2 lbs. $54.95

A Library of Basic Electronics
by Sy Levine

Book One – explores basic concepts and passive components – laying the foundation for more advanced study. Book Two – discusses the discrete semi-conductors and opto-electronics found in most present day and many early elevator controllers. Book Three – covers integrated circuits and computer concepts, as well as the “black boxes” found in today’s microprocessor-based elevator controllers.

Hardback

The Guide To Elevatoring

Includes over 150 illustrations, over 20 forms, 3 audio tapes and checklists designed for reproduction. Table of contents: Elevator Basics and Application, Traffic Handling, Operation and Control, Modernization, Layout, Maintenance Management, Codes and Standards, Building/Elevator Interface and Specifying. Also: 6 supplements and Elevator Industry Questions and Answers.

Loose-leaf binder, 450 pages Wt. 8 lbs. $99.95

For detailed information and easy online shopping: www.elevatorbooks.com
Elevator Traffic Analysis and Simulation Software

ELEVATE™ is the software used by designers worldwide to select the number, size and speed of elevators for all types of buildings. $2,800.00 plus $45.00 shipping
ELEVATE™ EXPRESS also available. $500.00
Download demo software, full manual and price list at: www.elevator-world.com or phone (251) 479-4514.

Motor Circuit Analysis: Theory, Application & Energy Analysis
by Howard W. Penrose, Ph.D
This publication offers a simplified approach to winding analysis of motors and transformers. A CD-ROM is included with the book. The software includes examples of predictive maintenance, troubleshooting and quality control from different types of installations. It also offers a student guidebook with data, examples and student tests that can be checked and graded through online support.

Softback, 218 pages
Wt. 2 lbs.

A Planner’s Guide to the APMs 2003, by Lawrence Fabian

The growing call for livable, sustainable cities is encouraging planners to search for better ways to configure and manage urban centers and districts. Automated people movers (APMs) are now on the menu of project planners seeking to substitute traffic and parking with environmentally friendly alternatives. As a consequence, the Planner’s Guide to APMs has been updated in a sixth edition. It is 50% larger and comes with a seminal “Primer” section that calls for new kinds of city buildings as opposed to the Neo-Traditionalism.

**Softback, 124 pages, Wt.2 lbs. $50.00**

Decorate your office, reception or public areas with artwork that represents you.

**Traction or Hydraulic Elevator**
See elevators inside and out. Great training tool. **$30.00 each**

**Cover Posters – Full Color – High Quality**
Laminated poster of ELEVATOR WORLD covers from June 1996 through the present – 18” x 24”. **$35.00 each.** Earlier covers available (additional cost applied).

**Blueprint Poster**
Educates with “The World of Elevator Systems.” Includes schematics of elevator systems including: hydraulic, traction and safety. Can be used as an educational tool, gift to employees or customers. **$10.00 each**

**Historic Prints**
See selection of 19 prints online at www.elevatorbooks.com 13” x 19” printed on archival paper. **$25.00 each**

**Equipment As Art**
Attractive, decorative component prints are great for courtroom presentation or just to decorate your office. Printed on high quality parchment paper and suitable for framing, 13” x 19”. (Framing not included) **$25.00 each**

**Amron Posters**
Attractive, decorative component prints are great for courtroom presentation or just to decorate your office. Printed on high quality parchment paper and suitable for framing, 13” x 19”. (Framing not included) **$25.00**

A History of the Passenger Elevator In The 19th Century
by Lee E. Gray

The extensive research that went into this publication takes us from the technological origins of the freight hoists in England and the U.S. to the elevators and skyscrapers of 1880 – 1900.

There is no question that anyone involved in the building industry will find A History of the Passenger Elevator in the 19th Century, fascinating and informative, with the engaging illustrations an added bonus.

Hardback, 336 pages
Over 175 illustrations
$69.95

Moving People: From Street to Platform – 100 Years Underground
Author, Ray Orton; Researcher, Nick Gaw;
Book Design, Grey Lipley and John Gale

Traces the history and development of the London Underground train network and the escalators that serve it. Author Ray Orton has worked for the London Underground for over 25 years and his enthusiasm for these unique machines and their environment will engage readers worldwide. Over 70 extraordinary photos!

Hardback, Coffee table sized at 11" x 9-1/2", Wt. 3 lbs.
$49.95

The Anatomy of Elevators
Elevator Component Images on CD-Rom or slides
by Roger E. Howkins and Fred English of Ove Arup & Partners

The professional’s tool for selling, teaching or demonstrating. Magnificent hand-colored illustrations include: Guide Rails, Car Frames, Sectioned Views, Buffers, Rope Terminators, Governors, Safety Gears and more. Presented in a proposal or lesson, the images give the visual punch necessary to grab the reader. CD-Rom includes jpeg images and power point presentation.

34 images on slides or CD ROM, please indicate.
Wt. 1 lb. $74.95

Images on this CD are also available in courtroom format.
Visit the online bookstore for complete selection.

Elevators Through The Ages
by Michel de l’Ormeraie and Maurice Poisson

A fascinating and beautiful book describing the history of elevators from their birth to the present day. It is a coffee-table book with a silver cover stamped in black period engravings and color reproductions. Specify English or French.

Hardback, 160 pages
Wt. 3 lbs. $135.00

100 of the World’s Tallest Buildings
by the International Council on Tall Buildings and Urban Habitat

World’s tallest skyscrapers glitter in print! A spectacular selection of the tallest and most fascinating skyscrapers that have ever been constructed. This large format book features a two-page layout of each building, with photographs, statistics, descriptions and plans.

Hardback, 220 pages, Wt. 3 lbs. $59.99

For detailed information and easy online shopping: www.elevatorbooks.com
Jallings’ Elevators

by John H. Jallings

Presenting the development and design of hand, belt, steam, hydraulic and electric elevators, Jallings’ Elevators served as a popular reference during the early 20th century. Starting with the fundamental principles of elevator technology, the book describes mechanical equipment, as well as car and car frames, guide rails and hoist ropes.

Hardback/Numbered, 420 pages, Wt. 2 lbs. $69.95

Elevators

by Frederick A. Annett

Originally published in 1961, when traction elevators were prominent, this publication is pertinent today since most of these elevators are candidates for modernization. Elevators provides vital information to anyone contemplating modernization or involved in the maintenance of such equipment. Printed by Elevator World, Inc. in its original style.

Hardback/Numbered, 387 pages, Wt. 2 lbs. $69.95

Electric Elevators, Books 1 & 2 (Combined)

by Fred Hymans

Lithocase Hardback, 366 pages, Wt. 2 lbs. $45.00

Speaking of Issues

by William C. Sturgeon

A compilation of 45 years of ELEVATOR WORLD editorials by William Sturgeon. He was a founding member of the National Association of Elevator Contractors and several other organizations. Reportage by Editor Sturgeon throughout the world greatly shaped ELEVATOR WORLD into a publication serving and read by the international elevator industry.

Hardback, 675 pages, Wt. 3 lbs. (Regularly $65.00)

Special Anniversary Price $49.95

The Concise Guide to Becoming an Independent Consultant

by Herman Holtz

Packed with expert advice, helpful tips and industry secrets to successful self-marketing.

Softback, 302 pages, 2 lbs. $21.95

How to Succeed as an Independent Consultant, Third Edition

by Herman Holtz

Information about the latest government procurement rules affecting consultants, recent trends such as “consultant selling” and the broader range of technical and professional services purchased on a consultancy basis is given.

Hardback, 432 pages, Wt. 2 lbs. $43.00

Marketing Your Consulting and Professional Services, Third Edition

by Dick Connor and Jeff Davidson

Provides the consultant with a means of establishing an effective, long-term marketing strategy – one that does not solely rely on individual contacts and that can be followed throughout an organization, so maximum market penetration is assured.

Hardback, 267 pages, Wt. 2 lbs. $35.00

by Herman Holtz

Hardback, 297 pages, Wt. 2 lbs. $35.00

**21-23 – Construct America™**, McCormick Place, Chicago, IL. Sponsor: The CSI Show™ and the TFM Show™. Contact Construction Specifications Institute at phone: 1-800-689-2900, fax: (703) 684-0465, e-mail: membcustsrv@csinet.org or website: www.csinet.org.

**27-29 – Elevcon Istanbul 2004**, Kempinski Hotel, Istanbul, Turkey. The 14th International Congress on Vertical Transportation Technologies. Organized by the International Association of Elevator Engineers (IAEE). Sponsored by ASRAY. Contact Ami Lustig at fax: (972) 3-573 2893 or e-mail: esl@netvision.net.il.

### MAY 2004

**3 – A17 Standards Committee Meeting**, St. Louis, MO. Contact Geraldine Burdeshaw at phone: (212) 591-8523 or fax: (212) 591-8501.

### JUNE 2004

**16-17 – Vertical Transportation Conference for Colleges and Universities**, University of Michigan, Ann Arbor, Michigan. Contact Terri Emmons at phone: (734) 647-5720, fax: (734) 647-5752 or e-mail: temmons@bf.umich.edu.

**Alligator in the Elevator**  
*by Rick Charette*  
Yikes! Children don’t know what to do when they come upon an alligator in the elevator. Rhythmic phrases and repetitive pattern along with delightful illustrations. Early readers.  
**Softback, 32 pages, Wt. 1 lb. $8.99**  
**Cassette, Wt. 1 lb. $9.98**

---

**The Elevator Family**  
*by Douglas Evans*  
An eccentric family arrives at a San Francisco hotel and discover there are no rooms available. They decide to stay in a room that has its ups and downs – the elevator. Lots of fun and zany characters. Ages 8-12.  
**Softback, 87 pages, Wt. 1 lb. $4.50**

---

**The Case of the Elevator Duck**  
*by Polly Berrien Bernends*  
Gilbert wants to be a detective when he grows up. So he practices all the time. Then one day he finds a duck in the elevator of his housing project. Where did it come from? Who owns it? Gilbert knows that no pets are allowed in the building. He also knows he’d better find the duck’s owner fast. If the housing inspector catches *him* with the illegal bird, Gilbert’s goose will really be cooked! Recommended for readers 6 to 10.  
**Softback, 60 pages, Wt. 1 lb. $3.99**

---

**Benefit to ELEVATOR WORLD Subscribers Only**

**http://research.elevator-world.com**  
A self-service research database giving users the ability to search text-based ELEVATOR WORLD articles 1953-2001, as well as online features and table of contents of more than 100 books. FREE TO SUBSCRIBERS ONLY.

---

**Research Center Subscriber Code –**  
Every month the Subscriber Access Code will appear in the EW Services Section of ELEVATOR WORLD Magazine.
Defensive Elevatoring
by D.A. Swerrie
Reprints of highly requested ELEVATOR WORLD articles by one of the industry’s most highly regarded safety engineers. Industry members who design, market, install, maintain, repair, modernize, inspect or operate vertical transportation equipment seek to be aware of hazards and appropriate countermeasures. This common concern for safety led to the publishing of this book.

**Softback, 290 pages, Wt. 1 lb. $25.00**

---

Elevator and Escalator Accident Reconstruction and Litigation
Prepare for any legal action you may face. Know what the attorneys know. Experience and expertise make this item a must for rising companies and individuals!

**Hardback, 356 pages, Wt. 3 lbs. $89.00**

---

Elevator Industry Law & Liability
It is important for industry members to be fully aware of the intricacies of legal action and become familiar with situations previously experienced in the field. Accidents, by their very nature, result from a complex chain of random events – many difficult to totally guard against and some a one-time occurrence.

In assessing liability, litigants rely heavily on precedent and proper case preparation. This 300-page book was developed to enumerate cases which have been adjudicated – describing specific accidents, subsequent judgements, deposition development and preparation.

**Softback, 316 pages, Wt. 3 lbs. $65.00**

---

**ONLINE ELEVATOR MUSEUM**

*Newly designed with easier navigation.*

Board an imaginary moving walk and take a horizontal tour of the graphics and photographs in each of the separate galleries.

---

The Museum for the Preservation of Elevating History

LOGBOOKS

*Electric Elevator & Escalator Maintenance
Spiral Bound, 62 pages, Wt. 1 lb. $20.00 each

*Hydraulic Elevator & Escalator Maintenance

2003 International Building Code
This comprehensive building code establishes minimum regulations for building systems using prescriptive and performance-related provisions. This 2003 edition is fully compatible with all International Codes (I Codes) published by the International Code Council (ICC).
Softcover, 660 pages, Wt. 4 lbs. $88.00

2002 National Electrical Code®
National Fire Protection Association
Outlines minimum standards for all types of electrical installations. 100% of the information needed to “meet code” and avoid costly errors.
Softcover, 700 pages, 8-1/2" x 11", Wt. 4 lbs. $65.00

by J.F. McPartland and Brian McPartland
The handbook analyzes code changes and offers practical advice to those involved in electrical design, installation or maintenance. It provides the know-how necessary for a thorough understanding of what must and must not be done to comply with all code rules and pass inspection the first time.
Hardback, 1,340 pages, Wt. 4 lbs. $75.00

For detailed information and easy online shopping: www.elevatorbooks.com
The only international publication of the building transportation industry.

Subscribers receive 12 monthly issues jam packed with articles that focus on the short range vertical transportation industry, column material concerning the global activities and advanced technology articles related to the dynamics of the industry. Included with your subscription, you will receive the Elevator World Source Directory, published each January. The SOURCE is the only international directory of elevator industry manufacturers, suppliers, contractors, consultants, associations and publications.
